

LOW-COST ALUMINIUM BENCH

The “low cost benches” come to life

In order to satisfy customers' needs that would like to have very well finished benches at low price, an “assembled version” has been created. The pre-drilled aluminium profiles will be assembled by the client using screws and rivets which will be supplied, maintaining the same aesthetic value as well as the resistance of the welded bench. Economic benefits concerning the bench together with the cost of transportation, are guaranteed.

The bench's polystyrene shelf is extremely resistant to UV rays and is provided with an antireflection treatment. 750mm height complete with filter and drain-cock. The characteristic grooves avoid water stagnation and ensure the ebb-flow systems.

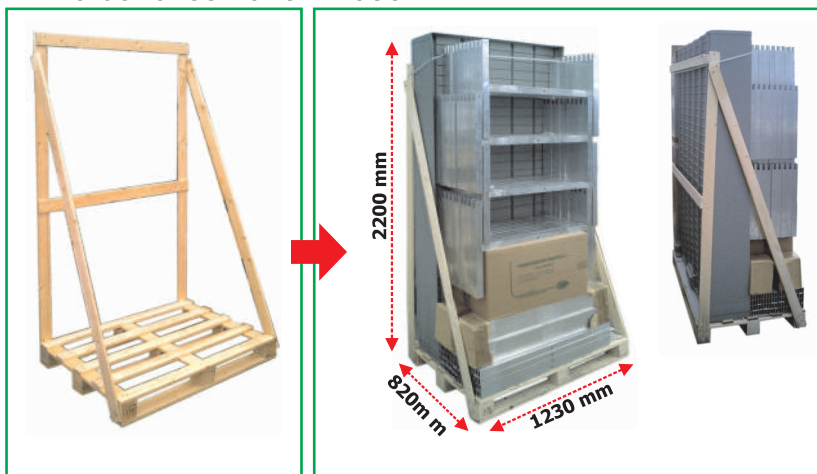

The shores' array guarantee a loading capacity up to 50kg/m².

OPTIONAL:

“Wheels set” complete of 4 plastic caps with steel threaded insert and 4 swivel castors Ø 100mm, 2 with brakes.
